## CERTIFICATION

### Programming In Java Problem Solving (Duck University) | [CERTIFICATE](#)

- Developed strong problem-solving skills using Java, including data structures, algorithms, and object- oriented programming concepts.
- Proficient in Java programming, debugging, algorithmic thinking, and optimizing code for efficiency.

### Structured Query Language (SQL) Bootcamp (Lets Upgrade) | [CERTIFICATE](#)

- Gained hands-on experience in writing SQL queries, database management, and data analysis.
- Proficient in SQL queries, joins, subqueries, data manipulation, and database optimization.

### HTML & CSS in depth For website Development (Meta) | [CERTIFICATE](#)

- Learned advanced concepts of HTML and CSS, including responsive design, CSS animations, and modern web development techniques.
- Proficient in HTML5, CSS3, Grid, responsive design, and website styling best practices.

---

## SKILLS SUMMARY

- **Languages :** JAVA, HTML, CSS, JavaScript
- **Frameworks :** Hibernate, Spring Boot, Tailwind
- **Tools :** Eclipse, VS code, Postman, Excel, MS word
- **Databases:** MySQL
- **Soft Skills:** Communication, Teamwork

## PROJECTS

### Chrome Extension for AI-Powered Email Replies

- Developed a Chrome extension using React, Spring Boot, and Google Gemini API to automatically generate intelligent email responses, improving email efficiency.
- Integrated AI-driven natural language processing to draft context-aware replies with minimal user input.
- Implemented a seamless frontend-backend architecture, ensuring real-time response generation within the browser.
- Enabled enhanced productivity by reducing email drafting time for users in professional settings.

### ContentHub Smart Contact Manager

- Developed a full-stack web application for contact management accessible from anywhere with cloud data.
- Implemented user authentication and authorization using Spring Security to ensure data privacy and security.
- Designed dynamic and responsive UI with **Tailwind CSS** and **JavaScript**, enhancing usability across devices.
- Enabled CRUD operations (Create, Read, Update, Delete) for user contacts, including image uploads and search functionality.
- Utilized **Thymeleaf** for server-side rendering and seamless data binding between frontend and backend.
- Built RESTful APIs in Spring Boot to manage contact data efficiently and ensure scalability.
- Integrated form validation, user feedback, and alert messages for a smooth and user-friendly experience.
